

huddling close together in a circle on the floor, and shuffling their bodies around in imperceptibly long, very rapid movements. One of my fellow students used to say that he thought this dance inspired modern styles such as Twotking.

### Arctic robot dance

An interesting example of historic information. English explorers in the 1960's believed they have discovered a new dance style characterised by "robotic", stilled movements being practiced by inhabitants of Northern Alaska and Canada. Later on however it was discovered that they were just moving like this because they were really cold.

For more of my research, see my LaTeX = "#">exotic dance research page

<h3> Exotic dance moves </h3>

Yes, you are right! As part of my post-doctorate work, I did study exotic tribal dances. To answer your question, my favourite dances are as follows, with definitions:

<bx></bx>

Polynesian chicken dance

<p style="margin-left: 15px;">A little known but very influential dance dating back as far as 500BC, a whole village would dance around in a circle like chickens, to encourage their livestock or to "fertilise".</p>

Scandinavian brownian shuffle

<p style="margin-left: 15px;">

Before the Scandinavians developed fire as a means of getting warm, they used to practice this dance, which involved

at some state - "text -

<li> Measuring the effect on the performance of funk bandplayers at temperature exceeding  $50^{\circ}\text{C}$ , when the audience size exponentially increases (effect of  $3 \times 10^3$  increasing to  $3 \times 10^4$ ).

<li> <u style="text-decoration-style: dotted">HTML and <u style="text-decoration-style: dotted">CSS constructs for representing musical stores. </li>

</ol>

So please can you provide more information on each of these subjects including how long you'd expect a research to take required staff and other resources, and anything else you think we'd need to know? Thanks

You can find more information about  
<a href = "#"> important university dates  
</a> on our website. <br>

### <h3> Subjects of Study </h3>

At the Awesome Science Faculty, we  
have a pretty open-minded research facility  
as long as the subjects fall somewhere in  
the realm of science and technology. You  
seem like an intelligent, dedicated researcher  
and just the kind of person we'd like to  
have on our team. Saying that, of the  
ideas you submitted we were most  
intrigued by are as follows, in the order  
of priority: <br>

<ol>

<li>Enter turning H<sub>2</sub>  
wine, and the health benefits of  
Resveratrol (C<sub>14</sub>H<sub><sub>3</sub></sub>  
>O<sub>3</sub>). </li>

Part of your <u style="text-decoration-style: dotted">PhD </u>  
next year. I will answer your questions  
one by one, in the following divs.

### <h3> Starting dates </h3>

We are happy to accommodate you  
starting your study with us at any time,  
however it would suit us better if  
you could start at the beginning of a  
semester, the start dates for each one  
are as follows:

<ul>

<li> First semester: 9 September 20

<li> Second semester: 15 January 20

</ul>

Please let me know if this is OK, and  
if so which start date you would prefer
